#### **DETAILED ACTION**

Page 2

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 1. Claims 1-53 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The phrase "integrally formed" has not been described in the specification to covey to one of the skill in the art the meaning of the phrase, i.e., what is to be considered integrally formed. Applicants state that the meaning of the phrase is found in figures 3a and 3b, but the examiner could not find/see anything on those figures that define the phrase, i.e., what structure in those figures are integrally formed?
- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-53 are vague and indefinite since the meaning of "integrally formed" is not clear and the metes and bounds of patent protection desired cannot be ascertained.

### Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 11, 15, 17-23, 31, 35, 37-42, 44 and 48-50 are rejected under 35 USC §102(b). This rejection is set forth in the prior Office action mailed on November 03, 2005.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 4-10, 12-14, 16, 24-30, 32-34, 36, 43, 45-47 and 51-53 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on November 03, 2005.

#### Response to Arguments

7. Applicant's arguments filed on February 03, 2006 have been fully considered but they are not persuasive.

Applicants argue that the phrase "integrally formed structure" defines over the cited reference, Ruf et al., since the reference does not show any integrally formed structure.

However, as explained above the phrase constitute new matter and even if it wasn't the cited reference show structure in the second surface that can be considered integral to the structure, e.g., the combination of the structure 9.6 and 8.6 of figure 6, and therefore, read over the phrase.

As to the arguments regarding the combination of the references and the optimization rejection, the arguments are unconvincing for the same reasons as explained in office action mailed on December 23, 2003.

#### Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to José A. Fortuna whose telephone number is 571-272-1188. The examiner can normally be reached on 9:30-6:00.

Application/Control Number: 10/072,876 Page 5
